Free Financial Counseling

with an Accredited Financial Professional

What is Financial Counseling?

Financial counseling is a service provided by accredited financial professionals to help Veterans and their families improve their financial well-being. Financial counseling can help you:

- Reduce debt.
- Create a spending plan or budget.
- Avoid foreclosure or eviction.
- Qualify for a first-time home purchase.
- Plan for key milestones, from college tuition to retirement.

Who are Accredited Financial Professionals?

Accredited financial professionals are certified by independent third-party organizations to provide a wide array of personalized financial counseling to meet your needs. They must act in your best interest and meet rigorous academic and testing requirements to achieve their certifications.
